

Great River[®]
ORGANIC MILLING

**Suppliers of Organic stone ground flours,
meals, whole grains and more**

About

Founded in 1975, Great River Organic Milling is located near the upper Mississippi River in western Wisconsin. The natural beauty of the surrounding area is a constant reminder of the importance of our responsibility to be good land stewards and how fortunate we are to be able to offer products from this area. All of our products are carefully selected to ensure that the quality exceeds your expectations. We also use natural granite stones for milling. We believe the stone enhances the quality, taste and nutritional integrity of whole grain flour.

Family values are also at the core of Great River Organic Milling's principles. We take pride in what we do and that we can offer something for everyone. From conventional, to gluten free to organic; we have it all!

Stone Ground Milling

The Stone Ground Difference. Here at Great River Organic Milling we start with sourcing quality organic grains. Quality grains are milled using granite stones that slowly turn between the two to create a nutritious quality flour. Our milling is done in a cool and gentle way, retaining vitamins and nutrients. The three parts that make up a grain are the bran, the germ and the endosperm. The bran provides fiber, protein and vitamins that are vital in maintaining a healthy digestive system. The germ provides B vitamins and fatty acids that are necessary for healthy brain function. The endosperm contains starches, carbohydrates, protein, iron and B vitamins. All of these nutrients are retained, creating quality organic, stone ground, whole grain flours.
